D. 1965.

P. V. WORLEY, Administrator,

This 25th day of August, 1965.

State Game and Fish Law.

THE SENTINEL has received from J. A Rodes, the State Game and Fish Warden, a copy of the Game and Fish Law, and also his construction of certain sections of the same. It is upon section 52 that different opinion- exist, that section stating that "it shall be unlawful for any person to hunt cutside of the county without first obtaining a license to do so." This license 19 good for only one year and is subject to restrictions regarding the period when game can be killed. The inference from this section is that a person does not require a li cense to hunt anywhere in his county, the margin of the paper. It tells the date and some good attorneys in the state contend that this is a fact.

The game warden takes a contrary view, basing his conclusions on other sections which explain how one must proceed to procure a license to hunt in the county, etc. Both the game warden and his critics seem certain of their view, and it will probably take a deci -ion of the courts to settle the matter. In the mean tine many persons throughout the state are taking out licenses and this is perhaps the best thing to do. A person has the right to hunt on his own land anywhere it the state without a

The warden also sends a plan for making chotes or ladders that the law requires where the streams are dammed, and as we have a few such places in our county, we here give description for its construction:

CRIB CR BULKHEAD.

Construct of white oak, cypress, pine or other duratle wood, 2x12 "joist stuff." Mitre and bolt the cornerthoroughly in order to resist the drift which might flort down and strike bulkhead Bolt the sides of bulk-head to the bottom at corners with strap irons, full length on sides, and nut and washer on under side of bottom The top crib on top of bulk head should project or stand out of the water at least two feet higher than the main chute.

Fill the crib and bulk-head with heavy stone or concrete, sufficient in weight to anchor the chute firmly down to dam. Always recess the chute in to dam sufficient to let full current of for Omaha and intermediate water flow through the fish-way at low water mark, the top of the chute must

If corrent is too strong to put chutin place, a temp rary coffer dam of said bags may be constructed in checking the flow of water until chute is in place 10:00 a.m. Helwar supplied by Rural Car- and bulk-head weighted down. Sand bags should be removed when chute is completed.

CHUTE OR RUN-WAY.

Construct the chute of twe-inch ma terial (white-oak). Build first the chute from the crib, letting 2x12 bottom pieces extend through under bulk-head. In making joints see to it that they come on the arms. Bolt the 2x12 arms 10:30 a.m. Villisca and Tarkio Valley to bottom and top with two one-half inch bolts to each arm letting them run clear through Also use plenty of spikes in securing all parts together. The run-way of the shute must extend to within two feet of the bottom of the river, and into the pool below the dam It may be placed at either side or in the 10:00 a.m. Rural Reute, No. t, leaves. Re- carter of the dam, but must be placed in the channel of the stream and where the greatest depth is always to be found.

Cover the entire chute with two inchwhite oak planks, leaving a two-inch space between the planks for the purpose of cleaning out the pockets. Use plenty of wire sails in the construction While to Forescap, Rule and points on the Support the slanting chute from the B & M. in Nebraska within he males of this hostom of the stre in by knees or horses on proper and sufficiently strong sup ports. The length of the chute is de-found a tomb-tone in Little Tarkio remorth and south are made un and depart at termined by the height of the dam, the fall being I feet to every one foot of line, daughter of David and Edza Tilbeight of the dam. In securing the chute to the horses or knees, place an iron hand over the chute and extend down and boil on to the upright sup-Convenes dest Monday in January; fourth ports in order that the two will be securely made fast together

find or form a solid bottom, and bolt firmly a cross arm from one to the other could easily remember back as far as extending on either side about 2 feet in that date. The stone was of marble the clear of the run way, and on this and was nicely carved." arm scentre by wiring sufficient weight Warren Dick, a resident of Mound to anchor and hold fast the lower end of chute to within 2 feet of bottom of for upwards of fifty years, clears up the Ber the Terms: First knowleys in Februs. Co-operation

Every intelligent farmer needs his ow o local weekly newspaper and a good agricultural family paper. He can't run his home or farm successfully without either of them.

A combination of the two, at a cost oot far from the regular price of one, is co-operation which saves the farmer noney, and gives him two papers every week for one year, filled with all news of local interest, and all up to-date ideas in modern and successful farming.

THE SENTINEL, Orogon, Mo. fills the bill for local news.

THE NEW YORK TRIBLES PARMER. New York City, published weekly, has no superior in the land as a thoroughly practical, helpful, entertaining, timetrated agricultural family paper

A special con ract enables us to furnish ho tool these papers one year for \$1.59, but if subscribed for separately, the regular price is \$2.50. Send all orders to THE SENTINEL, Oct.

the date of its shouth is stated March | Your name and address on a postal to Geo. W Best, Tribune Farmer Office,
